## HOW TO GET RID OF CORNS

A Simple, Safe and Reliable Way. No Pain or Soreness.

Thanks to a new discovery made by a Japanese product women will be wearing smaller and prettier shoes than ever. Corns are a thing of the past. A new preparation, called Ice-Mint, is said to make any corn or callous shrivel right up and lift off easily. Hard corns, soft corns or corns between the toes can be lifted right off and all after a touch or two of Ice-Mint. It's wonderful. No pain and not a bit of soreness while applying it or afterwards. People are learning to stop cutting and bleeding their corns and avoid the risk of blood poison. Simply get a few cents' worth of Ice-Mint from your druggist, and from the very second that it touches that sore, tender corn your poor, tired, aching feet will feel so cool, easy and comfortable that you will just wish with relief. Think of it—just a little touch of that cooling, soothing Ice-Mint and real foot joy is yours. In the real Japanese secret of fine, healthy little feet, and is highly appreciated by women who wear high heel shoes and men who have to stand on their feet all day.—Adv.

The machine was demolished, but fortunately the men escaped with only a few bruises. The cause of the accident was a broken steering gear. Marlon Wilson was driving and was accompanied by William Goddard and Clyde and Alex Carpenter.

A Mola Washing Machine in the home means that a few minutes will do the work of hours, and that it will save much time for recreation or other duties. All the work is done by the simple touch of a lever. It saves time, labor and clothes, and will soon pay for itself in the saving of clothes alone. It is an investment in health, in time, in comfort, and best of all in efficiency. It will wash the clothes better than any other method known. At the same time it is so scientifically constructed that it will wash the most delicate laces or the heaviest blankets without injury.

With a Mola Electric Washing Machine you will be independent of a laundress, or if you have a laundress it will give her several hours more time for ironing and soon save its cost in saving of wages. The first cost of a Mola is little enough when measured by the saving it will make. Many women prefer to take the money they pay a laundress and pay it on a Mola. In this way it is soon paid for and then pays you a dividend on your investment each week. Prices on application.
